

RULE 267 Air Pollution Equipment - Scheduled Maintenance

267 Scheduled Maintenance of Air Pollution Control Equipment:

In the case of shut down of air pollution control equipment for necessary scheduled maintenance, the intent to shut down such equipment shall be reported to the Air Pollution Control Officer at least twenty four (24) hours prior to the planned shutdown.

Such prior notice shall include, but is not limited to the following:

- 267.1** Identification of the specific facility to be taken out of service as well as its location and permit number;
- 267.2** The expected length of time that the air pollution control equipment will be out of service;
- 267.3** The nature and quantity of emissions of air contaminants likely to occur during the shut-down period;
- 267.4** Measures such as the use of off shift labor and equipment that will be taken to minimize the length of the shut down period;
- 267.5** The reasons that it would be impossible or impractical to shut down the source operation during the normal facility maintenance period.
