

COLUSA COUNTY PRESS RELEASE – November 4, 2016

We are pleased to announce that American Specialty Healthcare has signed an amended lease agreement with the County to begin the process of reopening the hospital in Colusa. The Board of Supervisors have worked diligently on this transaction for the past several months to ensure stable, quality care for the citizens of Colusa County. There are some remaining formalities which need to be completed but the County anticipates the bankruptcy court will issue necessary orders approving the transfer of the hospital lease to American Specialty by November 10, 2016. At that time, American Specialty will be able to take possession of the hospital property and start the work of obtaining necessary licensure from the California Department of Public Health. Although it will take a number of months to license the hospital, the County is looking forward to working with American Specialty to reopen the hospital as soon as possible.
