

**MEASURE A
ARGUMENT IN FAVOR OF**

Parks and Recreation districts have been recognized for their positive physical and aesthetic influences on their surrounding neighborhoods. They are also known to be key contributors to urban policy objectives such as job creation, youth development, public health, and community building. Parks and Recreation facilities can be devised to meet the needs of each community. They can offer individuals of all ages more than a place to play by providing well-designed programs that promote physical, intellectual, psychological, and social development. A Yes vote on Measure A would bring these attributes to your community and improve everyone's quality of life.
