

IMPARTIAL ANALYSIS OF MEASURE C

Trustees of the governing board of the Pierce Joint Unified School District currently must reside within one of the five separate trustee areas, and are nominated on that basis. Board members are elected by all the voters of the district.

This proposal would abolish the existing trustee areas, thereby eliminating the requirement of representation from each trustee area and would make all positions at large within the district. Board members would continue to be elected by all the voters of the district.

Incumbent board members would serve out their terms and succeeding board members would be nominated and elected in accordance with the new method of nomination.
